How to keep your money from being MURDERED!

If you are lucky enough to have any money set aside for a rainy day and you're keeping it in a savings account, you are really being taken.

Your money is probably earning about 5½ per cent interest. Since inflation is averaging 8 per cent to 10 per cent a year, you are not even breaking even. And the way things are going this year it can only get worse.

Do you realize that you have to spend \$1.49 to buy as much steak as you could buy for a dollar only a few months ago?

If you have any money invested in the stock market, you are really asking for it. Eighteen months ago Winnebago was considered one of the safest of the blue chip stocks on the New York Stock Exchange. A thousand dollars invested in this "safe" stock only a year and a half ago, as of this writing, would have shrunk to \$145.00. And hundreds of stocks have done even worse.

What about U.S. Savings Bonds? As an investment they are really a joke. Ten years ago if you had invested \$1,000.00 of your hard earned money in series "E" government bonds you would have by now earned only \$7.44 a year in purchasing power.

Well, how about keeping your money hidden in an old sock under the mattress? Had you tucked away a thousand dollars in this manner in 1957, by now your purchasing power would have dropped a full 40 per cent. Are things about to get better?

No way.

The year 1974 promises to produce the highest inflation rate in the last 22 years. Prices, as you may have noticed, are going no where but up. Some, like meat and gasoline are going right out of sight. The plain fact is that your money is in more danger right now than at anytime since 1929.

Is there a way out? Is there any place at all to put your money where it is safe? Where will it earn enough interest to keep ahead of inflation? Where you can get at it instantly in case of an emergency? Is there?

You bet there is!

The answer is going to surprise you. The best place to keep your money is probably the same place you are keeping it now. In your bank in a savings account. You've got to start doing things a little differently, however.

Here is just one of the things you can do if you know how. You can go to your bank, take out your savings, fill out a new deposit

ticket, put the money right back into another savings account and increase the interest on your savings from 6 to 15 per cent. All in one day! Hard to believe isn't it? But this is just the beginning.

Listen to all of this!

- *When you open a new account you can get ten bank gifts instead of one.*
- *You can withdraw your money and still earn interest on it.*
- *You can have two savings accounts paying you interest at the same time on the same money.*
- *You can earn interest on money you have spent months ago.*
- *You can earn more money on your checking account than most people earn on their savings accounts.*
- *You can earn interest on the money other people have or deposit.*

All of this is perfectly legal. Everything you will be doing is not only permitted but actually encouraged by banks and other financial institutions because the more money you make the more money they make. In fact, they use these techniques themselves. And during all this, your money will be insured 100 per cent by the U.S. Government. All of this is carefully explained in a new book titled, "How to Rob a Bank Without a Gun."

The book was written by an Ohio school teacher named Georg Jenney as part of a research project for a publishing company. The book is easy-to-read, easy-to-understand, and can lead you step-by-step to a new financial independence. The book is not now available at book stores or newsstands.
